About Decode Global

Decode Global Limited (the “Decode Global” or “Company”) is a leadingonline Forex and CFD broker registered and regulated in Vanuatu (CN 700415) . The Company brings together best of the class employees with decades of experience from major banks, investment banks, fund management, accounting and tax industries. This has allowed Decode Global to grow rapidly and attract traders at all levels world-wide.

02.0 /

Tokenomics

Decode Global launches the incentive token DECFX, a universal cryptocurrency within the DECFX brokerage business system, aiming to enable every user to easily participate and benefit from the platform ecosystem through a simple, interesting, and high-return mechanism. Whether you are a novice or an experienced trader, DECFX provides you with diverse reward opportunities to enjoy real economic returns through trading, holding, and participation, while helping the platform build an active and sustainable trading community.

TOKENOMICS GOALS

- **Incentivize active trading:**
  Trading rewards makes every transaction rewarding, encourages every user to actively participate, enjoy trading fun while accumulating wealth.

- **Enhance user loyalty:**
  The holding incentive and investment interest make users long-term partners of the platform, share the ecosystem dividend, and obtain stable income.

- **Sustainable development of the ecosystem:**
  Through reasonable token distribution and future deflation mechanisms, ensuring stable token value, healthy platform ecosystem, and providing reliable investment opportunities for investors.

DECFX token is the core driving force of Decode Global's ecosystem. Through a multi-level Incentive Mechanism, it closely connects users, traders, and agents to jointly promote platform growth. Users can not only enjoy tangible economic returns through trading, inviting, and holding tokens, but also deeply participate in the construction and development of the platform ecosystem.

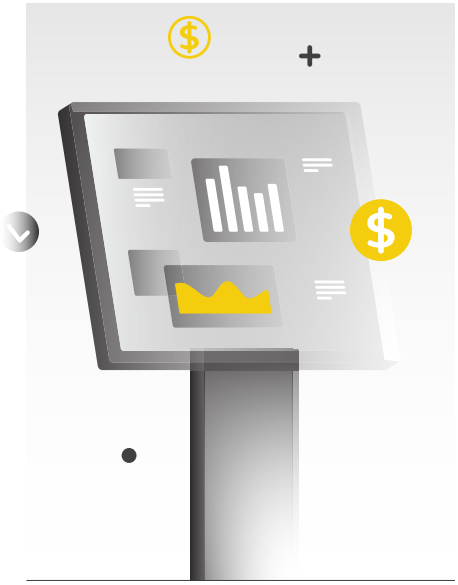
Ecosystem Incentives & Applications



33% of the total DECFX tokens will be dedicated to ecosystem incentives and applications:

- **10%**: Trading rewards, users can receive point rewards and exchange tokens for their trading behavior.
- **6%**: Financial investment, users can enjoy stable interest income when applying for financial management in Bifu.co. (Bifu.co refers to the digital exchange asset trading platform operated under the brand name “Bifu” by BIFU EXCHANGE LTD, a company currently undergoing transition from Decode Global. Please refer to https://bifu.co/en/ for more details on Bifu (“Bifu.co”));
- **6%**: Holding incentive, users will receive additional token income by holding tokens for a certain period of time.
- **6%**: Market-making incentives, supporting market makers to provide liquidity for the token.
- **5%**: Other incentives refer to additional rewards provided to participants in specific future activities.

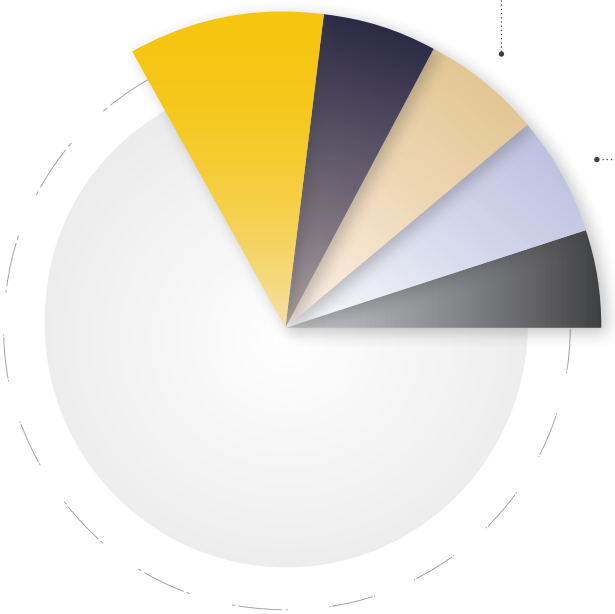
These mechanisms stimulate trading activity, user growth and long-term holding through diversified incentives, and build a sustainable ecosystem.

10%

TRADING REWARDS
Receive point rewards and exchange tokens for their trading behavior.

6%

FINANCIAL INVESTMENT
Enjoy stable interest income when applying for financial management in Bifu.co.



6%

HOLDING INVESTMENT
Receive additional token income by holding tokens for a certain period of time.

6%

MARKET-MAKING INCENTIVES
Support market makers to provide liquidity for the token.

5%

OTHER INCENTIVES
Additional rewards provided to participants in specific future activities.

02.3.1 / Ecosystem Incentives & Applications

Trading Rewards

On Decode Global, trading rewards are the core driving force of the DECFX token economy, aiming to allow every user to easily obtain additional rewards in daily trading and enjoy the growth dividends of the platform ecosystem. Whether you are a novice or an experienced trader, DECFX's trading rewards mechanism ensures that you can earn certain points for every trading (regardless of profit or loss), which can be exchanged for DECFX tokens.

What is transaction mining?

- **Mechanism:** Every trade you make on the Decode Global platform (based on the opening position value, denominated in USD), regardless of profit or loss, earns points proportionally based on the trading amount. These points can be exchanged for DECFX tokens at the real-time market price in Bifu.co.

- **Allocation:** 10% of the total supply of DECFX is dedicated to trading rewards, divided into 10 cycles, each cycle allocates 10% of the points pool. After the cycle ends, the reward is reduced compared to the previous cycle, the mining difficulty increases, and early participants are incentivized.

User Benefits:

- Simple and easy to obtain: Every trading has a return, no need for complex strategies, and reduces the participation threshold.
- Fair incentives: Regardless of the trading results, you can earn points by trading active levels, encouraging bold participation in the market.
- Early advantage: Higher rewards in early cycles (cycles 1-3), joining early can accumulate more DECFX!

How does transaction mining work?

- **Reward formula:**
  Personal trading reward = (personal opening value/10,000) × fixed reward × mining difficulty

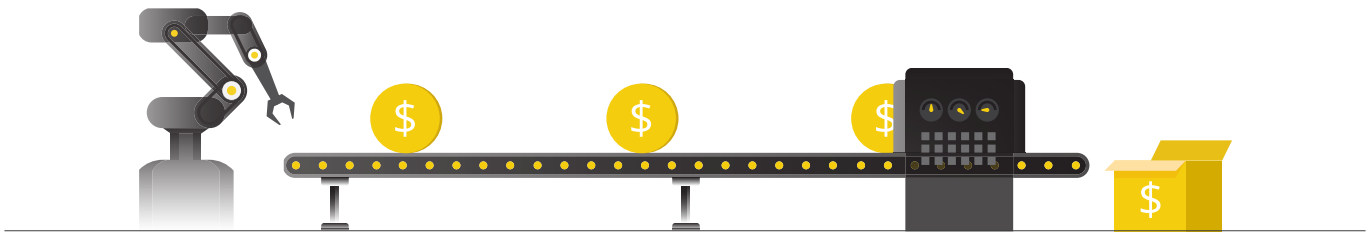
  - **Personal opening value:** The total opening value of all your trades on the platform (in USD).

  - **Fixed reward:** The basic coefficient set by the platform.

  - **Mining difficulty:** According to the cycle reward halving rule, the difficulty of each cycle is higher than the previous one.

  - **Example:** In the first cycle, you trade 10,000 USD opening value, if the fixed reward = 5, difficulty = 1, and earn 5 points (convertible for corresponding DECFX, depending on the market price).

  - **User Benefits:**
    - Flexible participation: You can earn points by trading at any time. The earlier the cycle, the higher the reward, motivating you to join as soon as possible.
    - Transparent and fair: Rewards are automatically calculated through the system and based on open formulas to ensure fair distribution.



02.3.1 / Ecosystem Incentives & Applications

Trading Rewards

Points exchange and lock release

- **Exchange process:** Points earned can be exchanged for DECFX tokens at real-time market prices in Bifu.co, with a simple and transparent exchange process.

- **Lock-up pool:** All exchanged DECFX tokens will enter the lock-up pool and be released linearly for 360 days starting from the latest exchange date (exchange day) (daily release = total amount of exchanged tokens/360), with about 1/12 (about 8.33%) released every month.

- **Multi-batch exchange:** Each exchange of tokens is independently calculated for a 12-month release period, and new exchanges are recalculated based on the latest date.

- **Example:**
  - You exchange 1,200 DECFX (November 1, 2025), release 1,200/360 ≈ 3.3333 per day, and unlock them all until October 26, 2026.

  - If you exchange 1200 DECFX on December 1, 2025, the remaining 1,100 DECFX in the lock pool will be recalculated and released on a date of (1,100 + 1,200)/360 = 6.3889 DECFX. All DECFX will be unlocked by November 25, 2026.

- **User Rewards:**
  - Market Protection: 12-month linear release avoids concentrated selling, reduces secondary market selling pressure, stabilizes DECFX price, and protects token value.

  - Flexible management: Redeem points at any time, release new tokens independently, and facilitate user investment planning.

  - Long-term incentives: Lock-up encourages mutual growth with the platform, and the released tokens can be used for trading, holding, or financial appreciation.

IB benefits

- **Mechanism:** After the start of transaction mining, users who register through the exclusive channels of the IB (such as invitation links or codes), an additional 10~20% of the user's trading reward points will be involved in the rebate system as commission rewards, which can be exchanged for DECFX tokens at the real-time market price in Bifu.co.

- **IB Benefits:**

  - **Simple and easy to get:** Just share the invitation link, invite friends to register and trade, and you can get rebate points without complicated operations.

  - **Continuous income:** You will receive a 15% commission for each trading from your referrals, and the more active the trading, the higher your income.

DECFX trading rewards turns every trading of users into a wealth opportunity! Regardless of profit or loss, users can earn points based on the trading amount, exchange them for DECFX tokens, enter the lock-up pool after exchange, and release them linearly for 360 days according to the latest exchange date to ensure market stability. Early cycle rewards are higher, and fair smart contract execution allows you to participate without worries. Combining token holding incentives, financial investment interest, and IB rewards, trading rewards opens the door to multiple returns for you. Trading is mining, holding is appreciation, and working with the platform to create a prosperous ecosystem, enjoying the fun of economic returns and community participation!

02.3.2 / Ecosystem Incentives & Applications

Financial Investment

In the DECFX token economy system of the Decode Global platform, the financial investment mechanism provides users with an opportunity to obtain stable interest income by locking tokens. Users deposit DECFX tokens into the earn treasure product of the Bifu.co platform, and can enjoy different interest rates according to the lock period. The reward comes from a dedicated incentive pool of 6% of the total supply.

Deposit into Bifu.co Earn Treasure and Enjoy Stable High Interest and High Returns

Mechanisms

- Users deposit DECFX tokens into Bifu.co platform's earn treasure product (an official wealth management product in cooperation with Decode Global), and can receive interest income after selecting a specific lock-up period. The aim is to provide users with a stable return path while supporting the long-term stability of the platform ecosystem.
- Interest is paid in the form of DECFX tokens and settled according to the lock-up period you choose. The specific amount is determined based on the lock-up period and specific interest rate.
- The interest rate is higher than the market average and will increase according to the lock-up period. The specific range will be dynamically adjusted by the platform based on market conditions and incentive pool size. The detailed parameters are subject to official announcements.

User Benefits:

- **Stable income:** Locking DECFX can earn interest, similar to traditional bank deposits, but with higher returns, suitable for users who pursue stable appreciation.
- **Flexible selection:** Multiple lock-up periods meet different investment preferences. Short-term users can maintain liquidity, while long-term users enjoy higher interest rates.
- **Simple operation:** One-click deposit through Bifu.co platform, intelligence system automatically manages interest payment, worry-free and effortless.
- **Stacked returns:** During the lock-up period, you can still participate in the holding incentive. Combined with trading mining points, your DECFX can achieve multiple returns.

Continuously updated

Decode Global will continuously optimize the interest rate, lock-up period, and release rules of Earn Treasure product based on market trends and user feedback. The updated content will be released through official announcements to ensure transparency and allow users to timely understand the latest investment opportunities, making your DECFX a wealth tool that continues to appreciate!

02.3.3 / Ecosystem Incentives & Applications

Holding Incentive

In the DECFX token economy system of the Decode Global platform, the holding incentive provides users with an opportunity to participate in the ecosystem by holding tokens. Users who hold DECFX tokens on the Bifu.co platform have the opportunity to regularly receive random airdrop rewards based on the amount and duration of holding tokens. These rewards come from a dedicated incentive pool of 6% of the total supply of DECFX, aimed at providing additional return options for holders.

Hold DECFX on Bifu.co Platform, Random Airdrop Rewards

Mechanisms

- By depositing DECFX tokens into Bifu.co platform account, users can participate in the holding incentive program.
- Based on the amount and duration of your holdings, popular trading tokens will be randomly distributed as airdrop rewards on a regular basis.
    - **Holding amount:** There is a minimum holding threshold (such as 1,000 DECFX, to be announced). The larger the holding amount, the higher the potential probability or scale of random airdrops.
    - **Holding time:** from short-term (e.g. 1 month) to long-term (over 1 year), the longer the duration, the higher the airdrop frequency or weight.
- The airdrop will be sent directly to your Bifu.co account, evaluating the user's holding status based on periodic snapshots (such as monthly or quarterly).
- The specific rewards will be given in the form of blind boxes, with randomness in distribution. However, the rewards will be popular trading tokens, local tokens, or stablecoins for that period. The specific probability and scale will be set by the platform based on incentive pool allocation and market conditions.

User Benefits:

- **Simple participation:** Simply hold DECFX tokens Bifu.co without complicated operations, suitable for ordinary users who want to participate easily.
- **Potential rewards:** Random airdrops add fun and potential returns to holding coins, which may bring unexpected token increments or other ecosystem benefits.
- **Ecosystem contribution:** Your holding behaviour supports the stability of the DECFX ecosystem and indirectly contributes to the development of the platform (such as supporting repurchase and destruction through transaction fees).

Continuously updated

Decode Global is committed to creating a fair and transparent incentive system and will continuously optimize the details of holding incentives based on market dynamics and user feedback. Updates will be timely released through official announcements to ensure that you always keep up with the latest opportunities, and participate in a prosperous trading ecosystem!

02.3.4 / Ecosystem Incentives & Applications

Other Incentives

Decode Global platform's DECFX token has designed a variety of Incentive Mechanisms for users, including holding incentives (airdrops), financial investment interest, market-making incentives, and other rewards, aiming to increase your participation enthusiasm, enhance token holding value, and help the platform build an active and prosperous trading ecosystem. Specific incentive content will be continuously updated to adapt to the market and user requests. The following are detailed introductions to other Incentive Mechanisms.

Other incentive allocation

11% of the total supply of DECFX is used for other incentives to ensure that users can obtain multiple returns outside of trading. The specific allocation is as follows:

- Market Maker Incentive (6%): Supports market makers to improve DECFX market liquidity and indirectly stabilize token value.
- Other rewards (5%): Flexible activity rewards, continuous expansion in the future, to meet diverse user requests.

Continuously updated

Decode Global is committed to creating a fair and transparent incentive system. It will continuously optimize the details of holding incentives, wealth management interest, market-making rewards, and other incentives based on market trends and user feedback. Updated content will be timely released through official announcements to ensure that you always have the latest opportunities and participate in a healthy and prosperous trading ecosystem.

02.4 / Tokenomics

Token Deflation

The DECFX token of the Decode Global platform is committed to creating a stable opportunity for appreciation through deflationary mechanisms such as repurchase and destruction! As a user, the DECFX tokens you hold will benefit from the platform's plan to repurchase and destroy tokens through operating income, reducing market circulation, enhancing token scarcity and long-term value. Combined with deflationary design of trading rewards, holding incentives, and financial investment, DECFX provides you with stable investment returns and helps build a prosperous trading ecosystem.

The specific deflation plan and implementation details will be continuously updated according to market conditions and platform development needs. The following is a preliminary introduction to the buyback destruction and deflation plan.

Repurchase and Destruction

The goal is to reduce market circulation and enhance the scarcity of tokens by repurchasing and destroying DECFX tokens, thereby supporting long-term value growth.

What is transaction mining?

- **Funding source:** The repurchase funds will mainly come from platform operating income, for example:
  - Part of the trading fee income.
  - Revenue generated by other businesses on the platform.
  - Future special project buyback funds that may be established.
- **Method of destruction:**
  - The repurchased DECFX tokens will be permanently removed from the circulation market, through smart contracts or transparent on-chain mechanisms.
  - The destruction records will be regularly made public (such as on-chain hashes or announcements) to ensure transparency and community trust.
- **Execution frequency:** The repurchase and destruction plan will be implemented periodically (such as quarterly or annual), and the specific frequency and scale will be dynamically adjusted according to market conditions and platform revenue.

Decode Global is committed to building a fair and transparent deflation system. It will continuously optimize the repurchase and destruction strategy and related mechanisms based on market dynamics, platform revenue, and community feedback. Updated content (such as repurchase scale, destruction frequency, and lock-up details) will be timely released through official announcements to ensure that you always have the latest opportunities and participate in a healthy and prosperous trading ecosystem.

Disclaimer

Important note: This disclaimer applies to the white papers, platform services, and all related activities of the Decode Global platform and its related tokens (hereinafter referred to as “DECFX tokens”). Before participating in the Decode Global platform, holding or using DECFX tokens, please read the following carefully. This disclaimer aims to clarify the legal liability scope of Decode Global and its affiliates, and remind users of the risks they may face when using the platform and tokens.

Information purposes

The information provided in this white paper is for reference only and does not constitute any investment advice, financial advice, trading advice, or any form of legal commitment. Decode Global is not responsible for any decisions made by users based on the content of the white paper.

Investment risk

High Risk Warning: The cryptocurrency and token market is highly volatile and speculative. The value of DECFX tokens may fluctuate significantly or even go to zero due to market conditions, regulatory changes, technical issues, or other unpredictable factors. Users should fully understand and bear all risks involved in participating in DECFX token trading or holding.

No income guarantee: Decode Global does not guarantee the future value, income, or market performance of DECFX tokens. The results of Incentive Mechanisms such as trading mining, agent acquisition, holding dividends, lock-up interest, repurchase and destruction are affected by market and platform operation conditions and do not guarantee any specific returns.

Personal Responsibility: Users need to evaluate their own financial situation and risk tolerance, and participate in platform activities or token trading cautiously. Decode Global is not responsible for any economic losses caused by market fluctuations, investment decisions, or other reasons.

Regulatory and legal risks

Legal compliance: The operation of DECFX tokens and Decode Global platform may be subject to laws and regulations in different countries or regions. Users are responsible for ensuring that their participation in platform activities and holding of DECFX tokens comply with the legal requirements of their jurisdiction. Decode Global is not responsible for any consequences caused by users’ violation of local laws and regulations.

Regulatory uncertainty: Global cryptocurrency regulatory environments may change, which may affect the use, trading, or value of DECFX tokens. Users should pay attention to and comply with relevant regulatory policies.

Technical and security risks

Technical Risk: Decode Global platform and DECFX tokens rely on blockchain technology, smart contracts, and other technical systems, which may lead to technical vulnerabilities, hacker attacks, system failures, or other unforeseen risks. Decode Global is not responsible for token loss, platform interruption, or other losses caused by technical issues.

User Responsibility: Users need to properly keep their account info, wallet private key, and related credentials. Losses caused by the user’s own reasons (such as loss of private key or account theft) shall be borne by the user.

Information Update and Accuracy

Dynamic Adjustment: The DECFX token economic model described in this white paper (including trading mining, agent acquisition, other incentives, repurchase and destruction mechanisms) may be adjusted based on market conditions, platform development, or community feedback. The specific details are subject to the official announcement of Decode Global, and the platform reserves the right to modify them at any time.

Information Accuracy: Although Decode Global strives to ensure the accuracy and timeliness of the white paper content, it does not make any express or implied warranties regarding the completeness, accuracy, or applicability of the information. Users should verify the information through official channels.

Third party risk

External platforms: The exchange, trading or other activities of DECFX tokens may involve third-party platforms (such as Bifu.co). Decode Global is not responsible for the security, reliability or operation of third-party platforms, and users need to evaluate the risks of third-party platforms themselves.

Partners: Decode Global may engage in activities with partners at the user's own risk, and Decode Global is not responsible for the actions or results of partners.

No guarantee and limitation of liability

No express or implied warranties: Decode Global makes no express or implied warranties with respect to the Platform Services, DECFX Tokens, and their related mechanisms, including but not limited to warranties of MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, or NON-INFRINGEMENT.

Limitation of Liability: To the fullest extent permitted by applicable law, Decode Global and its affiliates shall not be liable for any direct, indirect, incidental, special or consequential damages arising from customer engagement platform activities or holding of DECFX tokens.

Forward-looking statements

The descriptions in this white paper regarding Decode Global's future plans, repurchase and destruction plans, or other developments are forward-looking statements and are subject to various uncertainties, including market conditions, technological developments, regulatory changes, etc. Actual results may differ materially from forward-looking statements, and Decode Global does not make any guarantees about the implementation of these statements.

Accept the terms

Participating in Decode Global platform activities, holding or trading DECFX tokens indicates that the user has read, understood and agreed to the entire content of this disclaimer. Users should regularly follow Decode Global's official announcements to obtain the latest information and policy updates.

Contact details

If you have any questions about this disclaimer or the DECFX token, please contact us through the official channels of Decode Global. Any third-party interpretation or commitment to the content of the white paper without official authorization is invalid.
